

Thank you!

I Thank you very much for getting this headstone for us. It means alot to have a headstone on my Brothers grave.

Not having a headstone doesn't feel any different really Because it's still my Brother there. But it feels like if theres no marker there everyone forgets about him. I know noone forgot about him But it makes me feel more aware of him. Also it makes me feel that if he knew that you did this for him getting that stone, he would thank you very much. Now that we have one i feel relieved that now we have it more obvious to know he's there and where he's at.

So i thank you Because i think this has helped us very much. now finally after 13 almost 14 years he has a headstone. and i think thats very special to us that you did this for us, and after all these years we could never get one and now we have one now i thank you much for what you have given us.

Thank you,

Amanda
